

Continuous cleaning machines

Suitable for cleaning containers, KLT containers, shafts, etc.

- wash
- do the washing up
- dryings

Continuous cleaning machines

CONSTRUCTION / FUNCTION

Our continuous washing machines are equipped with various conveyor systems, such as Wire straps, conveyor belts, chain conveyors, roller conveyors, etc. designed.

The continuous washing systems are available in a multitude of different sizes and versions, even with several treatment zones.

The nozzle system is always arranged and designed so that all wettable surfaces are properly cleaned.

With appropriate add-on elements, these systems can be quickly and easily integrated into the modern production process.

APPLICATIONS

The systems are suitable for all workpieces that have to be cleaned from all sides. Thanks to the individual transport system in combination with the corresponding nozzle systems, a wide variety of laundry items can be cleaned.

Possible accessories (excerpt)

- suction
- Outriggers
- bath care
- dosing
- filter systems
- Material flow
- steam condenser
- controls
- drying process
